

OFS-95S fiber optic fusion splicer is designed as a highly flexible instrument with 6-motor precise micron level control and splice loss lower than 0.02dB for G.652 fiber. Equipped with removable universal fiber holders (250μm/900μm/patch cord/FTTx indoor fiber etc.), SOC holder and internal thermometer / barometer, OFS-95S can be deployed anywhere. Fast 5s startup, 9s splicing and automatic heating features enable the splicer an efficient tool for large volume splicing operation during fiber installation and maintenance.
